## HAND IN HAND AT BALDWIN

"THE HANDS OF MAN ARE SEEN  
OF HIS ACTIVITIES. AS WE LOOK  
AT THE HAND OF THE TEACHER,  
THE STUDENT, THE ATHLETE, WE  
SEE THE STORY OF THE INDIVIDUAL.  
EACH REVEALS HIMSELF IN HIS HANDS."

AS YOU READ THIS BOOK, WE  
HOPE YOU WILL COME TO REALIZE  
THE IMPORTANT PART MANY BUSY  
HANDS AT BALDWIN HIGH HAVE  
PLAYED THROUGHOUT THE SCHOOL  
YEAR 1948-1949.

The time has come when some of us must say a  
last good-by to our familiar school life and to  
the memories which shared it with us. We are  
the change of the scene. Building blocks for  
the future are being thrown up by the passing  
of time. In the past, we have seen the growth  
of the school, but it has not been the same  
one we have seen in the past.

## Foreword.....

During  
the past four  
years, we have been  
drawn together by a spirit  
of loyalty and good fellowship. As  
we prepare to leave, these memories are  
wonderful and necessary which is symbolic of our  
years at Baldwin. In the face of our school days, we  
find everything that Baldwin High School means to us.  
In this year's Balthe, we have tried to hand down to our successors  
through the story of the Alma Mater, an expression of our feelings.

## foreword

a picture can cut the haze of time—can make  
live again half forgotten memories—the balthe  
records these memories—this 1970 issue is the  
balthe's 30th recording of these memories

## the superintendent's message

saying farewell to those you respect and admire is never easy. in my more than 45 years in public education it has been my privilege to bid a fond farewell to many thousands of high school students as they embarked on new and varied careers

many of these are no longer living; many others are themselves nearing retirement age. some are just started in college, in the armed services, or in industry. did they chart courses for themselves or did they drift with the tide? did they build or tear down? were they peace makers or revolutionaries? would that i could learn how they all fared

some of them must have been involved in some way with the tremendous strides made by the greatest nation history has ever known. it is quite probable that some who passed through these halls are now engaged in righting the wrongs of racism which has long flourished in our land. i am sure that many are involved in research and discoveries that have brought and will continue to bring better health and longer life to all people

there must be at least a few of our own among the many who are today battling great odds in their search for solutions to the problems of hunger and pollution

it is very probable that some are deeply involved in the astronomical miracles that are emblazoned before our wondering eyes

we know only too well and sadly deplore the many of our own who have given and continue to give their very lives in the seemingly fruitless struggle for peace and justice in our world

involvement in these and many other great endeavors, too numerous to mention, must mean that certain results are being sought. we can't live on their laurels. so much more needs to be done

each of you must decide for yourself what results you want, have faith in your own decision and set your goal there. if your goals are achieved by demonstrating, marching, protesting, and rioting, then you must do that. if it takes burning, looting, and killing, then you must do that. certainly such means are as negative as to promise little or nothing of lasting value. goals are achieved, i think, by determination and self discipline, hard work, study, planning, and looking ahead to the consequences of our actions

as i write my last message to such a graduating class as this and say a farewell to teachers and students, i am assured that america is still in good hands. right will prevail. why am i so sure? because i have faith in you'

W. Robert Paynter

## *to the 1970 graduates*

*as this era in your life ends, pause to ask, "am i meeting the challenges of this scientific world in such a manner that i will ensure more productive years?"*

*that life is not stationary is one of the great truths which modern science has taught us. since we do not live in an insulated box which could protect us from the many challenges of the world, we must accept the challenges of the fast moving world.*

*we should expand our consciousness in order that we become acutely aware of ourselves and of others. each careful consideration on the minuteness of life shall be reflected in a change not only in ourselves but also in the world: when one life changes, the world changes*

*if we gladly accept the challenges of today and eagerly await the challenges of tomorrow, we will have assurance that we will be able to look forward to more productive years*
